

DGSTATION

CONNECTING PEOPLE TO DIGITAL HOME ENTERTAINMENT

AB IPBox 900HD/9000HD plugin development SDK

We open AB IPBox 900HD/9000HD plugin development SDK.

1. Install CDK(STLinux-2.2)

1.1. Install from ST server.

Visit <http://www.stlinux.com>. And follow their document.

You can see rpm/srpm packages from <ftp://ftp.stlinux.com>

1.2. DGStation pre-compiled version.

Download CDK(STLinux-2.2) from http://dev.dgstation.co.kr/release/cuberevo/sh4_cdk_target-20080522.tgz

Unzip to /opt/ with root account

2. Checkout source tree

We use subversion for manage source tree. Please install subversion first.

You can checkout source tree with following command.

```
svn co http://http://dev.dgstation.co.kr/repos/cuberevo .
```

You can checkout source tree freely, but can not write to server. Please send patch or source for fix bug or new plugin. If you need helps, contact dev.plugin@dgstation.co.kr please.

3. Source tree

README - this document

include/ - all headers for plugin.

plugin/ - plugin example

4. Contacts

If you need helps contact dev.plugin@dgstation.co.kr or <http://dev.dgstation.co.kr>

5. Example

read 'README' file in 'plugin' folder
